Proteins

Cytochrome *c*-specific protein methylase III from *Neurospora crassa*.
By S. Nochumson, E. Durban, S. Kim & W. K. Paik 11

Biologically active macromolecular forms of oxytocin. [8-Lysine]oxytocin as a suitable ligand.
By C. R. Snell & D. G. Smyth 43

Purification and some properties of the protein component of tissue thromboplastin from human brain.
By E. Bjørklid & E. Storm 89

Characterization of the extracellular haemoglobins of *Artemia salina*.
By L. Moens & M. Kondo 111

Oxidation of human haemoglobin by copper. Mechanism and suggested role of the thiol group of residue β-93.
By C. C. Winterbourn & R. W. Carrell 141

A carbohydrate-deficient membrane glycoprotein in human erythrocytes of phenotype S–s–.
By M. J. A. Tanner, D. J. Anstee & P. A. Judson 157

Nucleic Acids

Estimation of gene reiteration from hybridization kinetics in moderate deoxyribonucleic acid excess.
By M. Muto 19

Carbohydrates

The covalent linkage of protein to carbohydrate in the extracellular protein–polysaccharide from the red alga *Porphyridium cruentum*.
By J. Heaney-Kieras, L. Rodén & D. J. Chapman 1

PAGE

Small Molecules

Adenosine 3′:5′-cyclic monophosphate in higher plants. Isolation and characterization of adenosine 3′:5′-cyclic monophosphate from *Kalanchoe* and *Agave*.
By A. R. Ashton & G. M. Polya 27

Enzymology

Purification and properties of a cellulase from *Aspergillus niger*.
By P. L. Hurst, J. Nielsen, P. A. Sullivan & M. G. Shepherd 33

Purification and properties of human kidney-cortex hexosaminidases A and B.
By J. E. Wiktorowicz, Y. C. Awasthi, A. Kurosky & S. K. Srivastava 49

An automatic method for deriving steady-state rate equations.
By A. Cornish-Bowden 55

Kinetic evidence for a 'mnemonical' mechanism for rat liver glucokinase.
By A. C. Storer & A. Cornish-Bowden 61

A pulse-radiolysis study of the manganese-containing superoxide dismutase from *Bacillus stearothermophilus*. A kinetic model for the enzyme action.
By M. E. McAdam, R. A. Fox, F. Lavelle & E. M. Fielden 71

A pulse-radiolysis study of the manganese-containing superoxide dismutase from *Bacillus stearothermophilus*. Further studies on the properties of the enzyme.
By M. E. McAdam, F. Lavelle, R. A. Fox & E. M. Fielden 81

An investigation of the interactions of the allosteric modifiers of pyruvate kinase with the enzyme from *Carcinus maenas* hepatopancreas.
By I. G. Giles, P. C. Poat & K. A. Munday 97

Affinity chromatography and inhibition of chorismate mutase–prephenate dehydrogenase by derivatives of phenylalanine and tyrosine.
By G. D. Smith, D. V. Roberts & A. Daday 121

PAGE

Purification and some properties of arylsulphatases A and B from rabbit kidney cortex.
By J.-J. Helwig, A. A. Farooqui, C. Bollack & P. Mandel 127

The use of non-aqueous chloroform/methanol extraction for the delipidation of brain with minimal loss of enzyme activities.
By T. Kurihara, Y. Nishizawa & Y. Takahashi 135

PAGE

Purification and steady-state kinetics of adenosine 5′-pyrophosphate sulphurylase from baker's yeast.
By R. G. Nicholls 149

General Methods

An evaluation of ways of using equilibrium dialysis to quantify the binding of ligand to macromolecule.
By I. A. Nimmo, G. L. Atkins, R. C. Strange & I. W. Percy-Robb 107

RAPID PAPERS

PAGE

Proteins

The synthesis of tritium-labelled human corticotropin of high specific radioactivity.
By D. E. Brundish & R. Wade 169

Carbohydrates

3-*O*-Methyl sugars as constituents of glycoproteins. Identification of 3-*O*-methylgalactose and 3-*O*-methylmannose in pulmonate gastropod haemocyanins.
By R. L. Hall, E. J. Wood, J. P. Kamerling, G. J. Gerwig & J. F. G. Vliegenthart 173

PAGE

Enzymology

Modification of the kinetic parameters of aldolase on binding to the actin-containing filaments of skeletal muscle.
By T. P. Walsh, F. M. Clarke & C. J. Masters 165

Contents of Volume 165, No. 2

FULL PAPERS

PAGE

Proteins

The gross architecture of an antibody-combining site as determined by spin-label mapping.
By B. J. Sutton, P. Gettins, D. Givol, D. Marsh, S. Wain-Hobson, K. J. Willan & R. A. Dwek 177

Comparison of the dimensions of the combining sites of the dinitrophenyl-binding immunoglobulin A myeloma proteins MOPC 315, MOPC 460 and XRPC 25 by spin-label mapping.
By K. J. Willan, D. Marsh, C. A. Sunderland, B. J. Sutton, S. Wain-Hobson, R. A. Dwek & D. Givol 199

PAGE

The combining site of the dinitrophenyl-binding immunoglobulin A myeloma protein MOPC 315.
By S. K. Dower, S. Wain-Hobson, P. Gettins, D. Givol, W. R. C. Jackson, S. J. Perkins, C. A. Sunderland, B. J. Sutton, C. E. Wright & R. A. Dwek 207

Appendix: Application of ring-current theory based on the Johnson–Bovey equation to the aromatic amino acids.
By S. J. Perkins, S. K. Dower, P. Gettins, S. Wain-Hobson & R. A. Dwek 223

PAGE

Specificity of interactions of hapten side chains with the combining site of the myeloma protein MOPC 315.
By S. Wain-Hobson, S. K. Dower, P. Gettins, D. Givol, A. C. McLaughlin, I. Pecht, C. A. Sunderland & R. A. Dwek 227

Properties of soluble somatostatin-binding protein.
By N. Ogawa, T. Thompson, H. G. Friesen, J. B. Martin & P. Brazeau 269

Fragments produced by digestion of human immunoglobulin G subclasses with pepsin in urea.
By D. M. Parr 303

Subtilisin modification of monodeamidated ribonuclease-A.
By B. N. Manjula, A. S. Acharya & P. J. Vithayathil 337

Glutamine as a precursor to *N*-terminal pyrrolid-2-one-5-carboxylic acid in mouse immunoglobulin λ-type light chains. Amino acid-sequence variability at the *N*-terminal extra piece of λ-type light-chain precursors.
By Y. Burstein & I. Schechter 347

Nucleic Acids

Characterization of double-stranded ribonucleic acid sequences present in the initial transcription products of rat liver chromatin.
By E. Pays 237

The aminoacylation of transfer ribonucleic acid. Recognition of methionine by *Escherichia coli* methionyl-transfer ribonucleic acid synthetase.
By J. M. Old & D. S. Jones 367

Carbohydrates

Specificity of flavobacterial glycuronidases acting on disaccharides derived from glycosaminoglycans.
By P. Hovingh & A. Linker 287

Enzymology

Purification and properties of histidinol dehydrogenases from psychrophilic, mesophilic and thermophilic bacilli.
By J. A. Lindsay & E. H. Creaser 247

Kinetics of nitrogenase of *Klebsiella pneumoniae*. Heterotropic interactions between magnesium–adenosine 5′-diphosphate and magnesium–adenosine 5′-triphosphate.
By R. N. F. Thorneley & A. Cornish-Bowden 255

PAGE

N-Phenylglycolhydroxamate production by the action of transketolase on nitrobenzene.
By M. D. Corbett & B. R. Chipko 263

Substrate-induced deactivation of penicillinases. Studies of β-lactamase I by hydrogen exchange.
By P. A. Kiener & S. G. Waley 279

Effects of proteolytic digestion by chymotrypsin on the structure and catalytic properties of reduced nicotinamide–adenine dinucleotide–ubiquinone oxidoreductase from bovine heart mitochondria.
By S. E. Crowder & C. I. Ragan 295

Microbial metabolism of aromatic nitriles. Enzymology of C–N cleavage by *Nocardia* sp. (*Rhodochrous* group) N.C.I.B. 11216.
By D. B. Harper 309

Acetyl-coenzyme A and coenzyme A analogues. Their effects on rat brain choline acetyltransferase.
By J. Rossier 321

Variable-temperature magnetic-circular-dichroism spectra of cytochrome *c* oxidase and its derivatives.
By A. J. Thomson, T. Brittain, C. Greenwood & J. P. Springall 327

Kinetic properties of a magnesium ion- and calcium ion-stimulated adenosine triphosphatase from the outer-membrane fraction of rat spleen mitochondria.
By E. K. Vijayakumar & M. J. Weidemann 355

The structure of L-lactate oxidase from *Mycobacterium smegmatis*.
By P. A. Sullivan, Y. S. Choong, W. J. Schreurs, J. F. Cutfield & M. G. Shepherd 375

Modification of lactate oxidase with diethyl pyrocarbonate. Evidence for an active-site histidine residue.
By Y. S. Choong, M. G. Shepherd & P. A. Sullivan 385

The soluble methane mono-oxygenase of *Methylococcus capsulatus* (Bath). Its ability to oxygenate *n*-alkanes, *n*-alkenes, ethers and alicyclic, aromatic and heterocyclic compounds.
By J. Colby, D. I. Stirling & H. Dalton 395

RAPID PAPERS

PAGE

Small Molecules

The high-performance liquid-chromatographic analysis of ficaprenol and dolichol.
By R. W. Keenan, N. Rice & R. Quock 405

PAGE

Enzymology

Aldolase-like imine formation in the mechanism of action of phosphonoacetaldehyde hydrolase.
By J. M. La Nauze, J. R. Coggins & H. B. F. Dixon 409

Chromous ion reduction of mammalian cytochrome oxidase and some of its derivatives.
By C. Greenwood, T. Brittain, M. Brunori & M. T. Wilson 413

Contents of Volume 165, No. 3

FULL PAPERS

PAGE

Proteins

Restoration of β-galactosidase to *Escherichia coli* M15. Complementation studies.
By D. V. Marinkovic & J. N. Marinkovic 417

Partial purification of two lithocholic acid-binding proteins from rat liver 100000*g* supernatants.
By R. C. Strange, R. Cramb, J. D. Hayes & I. W. Percy-Robb 425

Isolation and characterization of membrane receptors for pokeweed mitogens from mouse lymphocytes.
By K. Yokoyama, T. Terao & T. Osawa 431

The isolation and structure of C4, the fourth component of human complement.
By I. Gigli, I. von Zabern & R. R. Porter 439

Semisynthetic analogues of insulin. The use of *N*-substituted derivatives of methionine as acid-stable protecting groups.
By D. J. Saunders & R. E. Offord 479

A simplified electrophoretic system for determining molecular weights of proteins.
By C. Manwell 487

The isolation and characterization of corticotropin from the pituitary gland of the ostrich *Struthio camelus*.
By R. J. Naudé & W. Oelofsen 519

A fluorimetric study of the role of calcium ions in the stability of thermolysin.
By A. Fontana, C. Vita, E. Boccu & F. M. Veronese 539

PAGE

Effect of lipophilic character on the biological activity of synthetic angiotensin peptides.
By V. L. A. Nouailhetas, C. R. Nakaie, L. Juliano & A. C. M. Paiva 547

Nucleic Acids

Accumulation of O^6-methylguanine in non-target-tissue deoxyribonucleic acid during chronic administration of dimethylnitrosamine.
By G. P. Margison, J. M. Margison & R. Montesano 463

Enzymology

The effects of amphiphilic cationic drugs and inorganic cations on the activity of phosphatidate phosphohydrolase.
By M. Bowley, J. Cooling, S. L. Burditt & D. N. Brindley 447

Evidence for two-step binding of reduced nicotinamide–adenine dinucleotide to aldehyde dehydrogenase.
By A. K. H. MacGibbon, P. D. Buckley & L. F. Blackwell 455

Purification and properties of a nuclear protein kinase from rat mammary gland.
By G. C. Majumder 469

Purification and some properties of 1-aspartamido-β-*N*-acetylglucosamine amidohydrolase from human liver.
By B. Dugal & J. Strømme 497

PAGE

Characterization of glyoxalase I purified from pig erythrocytes by affinity chromatography.
By A.-C. Aronsson & B. Mannervik 503

Purification and properties of a ribosomal casein kinase from rabbit reticulocytes.
By O.-G. Issinger 511

Effect of substrates and effectors on the reversible inactivation of pig spleen phosphofructokinase by adenosine triphosphate.
By M. J. Weidemann, M. E. Kolbuch-Braddon & P. E. Hickman 525

PAGE

Phenol sulphotransferase and uridine diphosphate glucuronyltransferase from rat liver *in vivo* and *in vitro*. 2,6-Dichloro-4-nitrophenol as selective inhibitor of sulphation.
By G. J. Mulder & E. Schlotens 553

Binding proteins for adenosine 3′:5′-cyclic monophosphate in bovine adrenal cortex.
By S. O. Døskeland & P. M. Ueland 561

A novel mechanism of enzymic ester hydrolysis. Inversion of configuration and carbon–oxygen bond cleavage by secondary alkylsulphohydrolases from detergent-degrading micro-organisms.
By B. Bartholomew, K. S. Dodgson, G. W. J. Matcham, D. J. Shaw & G. F. White 575

RAPID PAPERS

PAGE

Lipids

Purified human liver acid β-D-galactosidases possessing activity towards G_{M1}-ganglioside and lactosylceramide.
By A. L. Miller, R. G. Frost & J. S. O'Brien 591

PAGE

Enzymology

The apparent molecular weights of human intestinal aminopeptidase, enterokinase and maltase in native duodenal fluid.
By A. I. Magee, D. A. W. Grant & J. Hermon-Taylor 583

Carbon-2 proton exchange at histidine-41 in bovine erythrocyte superoxide dismutase.
By A. E. G. Cass, H. A. O. Hill, B. E. Smith, J. V. Bannister & W. H. Bannister 587
